Media

<audio>

The `<audio>` HTML element is used to embed sound content in documents. It may contain one or more audio sources, represented using the `src` attribute or the `<source>` element: the browser will choose the most suitable one.

```
<audio controls src="/your_file_location/yourfile.mp3">
            <a href="/your_file_location/yourfile.mp3">
                Download audio
            </a>
</audio>
```

<video>

The `<video>` HTML element embeds a media player which supports video playback into the document. You can use `<video>` for audio content as well, but the `<audio>` element may provide a more appropriate user experience.

```
<video controls width="250"> <!--You can

    <source src="/your_file_location/yourfile.webm"
            type="video/webm">

    <source src="/your_file_location/yourfile.mp4"
            type="video/mp4">

    Download the
    <a href="/your_file_location/yourfile.webm" download="video">WEBM</a>
    or
```

```
        <a href="/your_file_location/yourfile.mp4" download="video">MP4</a>
        video.
    </video>
```
